

Minor Project Report
on
Deep Learning for Emotion Recognition in Cartoons

Submitted to Guru Gobind Singh Indraprastha University, Delhi (India)

In partial fulfillment of the requirement for the award of the degree

of

Bachelor of Technology
in
Information Technology

Under the guidance of

Ms. Preeti Sehrawat
Assistant Professor
Information Technology

Submitted By:

**(GURU GOBIND SINGH INDRAPRASTHA UNIVERSITY,
DWARKA, NEW DELHI)**

(December 2023)

CANDIDATE'S DECLARATION

It is hereby certified that the work which is being presented in the B.Tech. Minor Project report entitled **Deep Learning for Emotion Recognition in Cartoons** in partial fulfillment of the requirements for the award of the degree of **Bachelor of Technology** and submitted in the **Department of Information Technology, New Delhi (Affiliated to Guru Gobind Singh Indraprastha University, New Delhi)** is an authentic record of our work carried out during a period from **August 2023 to December 2023** under the guidance of **Ms. Preeti Sehrawat (Assistant Professor)**.

The matter presented in the B.Tech. Minor Project Report has not been submitted by us for the award of any other degree of this or any other institute.

Shubham Kumar
(00815007721)

Abhishek Sharma
(00115007721)

Arjun Sharma
(00415007721)

This is to certify that the above statement made by the candidates are correct to the best of my knowledge. They are permitted to appear in the External Minor Project Examination.

Ms. Preeti Sehrawat
(Assistant Professor)

Prof. Prabhjot Kaur
(HOD, IT Department)

The B.Tech. Minor Project Viva-Voce Examination of **Shubham Kumar (00815007721)**, **Abhishek Sharma (00115007721)**, **Arjun Sharma (00415007721)** has been held on **19.12.2023**.

Project Coordinator

(Signature of External Examiner)

ACKNOWLEDGEMENT

We express our deep gratitude to **Ms. Preeti Sehwat**, (Assistant Professor), Department of Information Technology for her valuable guidance and suggestions throughout our project work. We are thankful to **Dr. Preeti Rathee**, Project Coordinator for her valuable guidance.

We would like to extend our sincere thanks to the **Head of Department, Prof. Prabhjot Kaur** for her time-to-time suggestions to complete our project work. We are also thankful to **Prof. Archana Balyan, Director (O) of MSIT** for providing us with the facilities to carry out our project work.

Shubham Kumar

ABSTRACT

Emotion Recognition is a field that computers are getting very good at identifying; whether it's through images, video or audio. Emotion Recognition has shown promising improvements when combined with classifiers and Deep Neural Networks showing a validation rate as high as 59% and a recognition rate of 56%. The focus of this dissertation will be on facial based emotion recognition. This consists of detecting facial expressions in images and videos. While the majority of research uses human faces in an attempt to recognize basic emotions, there has been little research on whether the same deep learning techniques can be applied to faces in cartoons. The system implemented in this paper, aims to classify at most three emotions (happiness, anger and surprise) of the 6 basic emotions proposed by psychologists Ekman and Friesen, with an accuracy of 80% for the 3 emotions. Showing promise of applications of deep learning and cartoons. This project is an attempt to examine if emotions in cartoons can be detected in the same way that human faces can.

LIST OF FIGURES

Fig. No.	Title of the Figure	Page Number
1.1	An example of the McCulloch-Pitts (MCP) neuron	2
1.2	An example of the Perceptron	3
1.3	The XOR problem	4
1.4	A Multi-Layer Perceptron	5
1.5	Convolutional Neural Network	6
1.6	Recurrent Neural Network & Vanishing Gradient Problem	7
1.7	LSTM unit	7
2.1	An illustrated example of parameter sharing	17
2.2	An example of a 2D convolution	19
2.3	Max pooling	20
2.4	Fully Connected Network & ReLU.	21
2.5	An illustrated example of the softmax function	22
2.6	AlexNet architecture	24
2.7	ImageNet classification on Cartoons	26
3.1	<i>Trello</i> Board	29
3.2	This project's <i>Trello</i> board	29
4.1	A scene from <i>Tom & Jerry</i>	33
4.2	<i>YouTube</i> results for the query 'Tom & Jerry'	34
4.3	Sample set of videos from the Joni Valentayn <i>YouTube</i> channel	35
4.4	Different Haar-like features	36
4.5	Haar-like features detecting features in a face	36
4.6	The architecture of the 1 st step process, dataset construction & segmentation	38
4.7	The architecture of the 2 nd step process.	39
4.8	Haar cascade training for positive images	42
4.9	Before and after segmenting a region of a face	44
4.10	Result after multi-class classification	46
4.11	Convolution visualizations	47
5.1	Results Graphs, Run 1	53
5.2	Results Graphs, Run 2	55
5.3	Results Graphs, Run 3	56
5.4	Results Graphs, Run 4	58
5.5	Results Graphs, Run 5	59

LIST OF TABLES

Table No.	Title of the Table	Page Number
2.1	ImageNet classification of the zebra by (Randomlists.com, n.d) in Figure 2.6. .	24
5.1	Hyperparameter Table, Run 1.	52
5.2	Results Table, Run 1.	53
5.3	Hyperparameter Table, Run 2.	54
5.4	Results Table, Run 2.	54
5.5	Hyperparameter Table, Run 3.	55
5.7	Results Table, Run 3.	56
5.7	Hyperparameter Table, Run 4.	57
5.8	Results Table, Run 4.	57
5.9	Hyperparameter Table, Run 5.	58
5.10	Results Table, Run 5.	59
5.11	Algorithms with the best loss accuracy out of all 5 runs.	60
6.1	The original risk matrix from project proposal	62
B.1	The first 32 <i>Tom & Jerry</i> episodes of the images that are included in the dataset of this project.	65
B.2	The last 32 <i>Tom & Jerry</i> episodes of the images that are included in the dataset of this project.	66

LIST OF ABBREVIATIONS

Abbreviation	Full form of Abbreviation
AFEW	Acted Facial Expression in the Wild
ANN	Artificial Neural Network
CNN	Convolutional Neural Network
DBN	Deep Belief Network
FER-2013	Facial Expression Recognition-2013
